

Tool 2 · Green Energy Evaluation Checklist

Sustainable SME Toolkit · Nigeria

Energy is one of the top three operating costs for almost every Nigerian SME, and it is the cost line with the most exposure to risk. A score in the Beginner band does not mean you must immediately install solar — it means you have not yet built the knowledge to do so.

#	Item	Wt	Rating (1-5)	Score
1	You know your average monthly electricity consumption in kWh (grid + generator)	3		
2	You know your average monthly diesel or petrol consumption (litres) and cost	3		
3	You have a 7-day load profile (hour-by-hour power demand) for a typical operating day	2		
4	You have identified your critical loads (what must stay on during an outage)	2		
5	Roof or ground space available for solar panels has been measured (m ²)	2		
6	Roof orientation and shading have been assessed (south-facing is ideal in Nigeria)	1		
7	Roof structural condition has been inspected (no leaks, can carry panel weight)	2		
8	All lighting has been converted to LED	2		
9	Air conditioners are inverter-type and sized correctly for each room	1		
10	Refrigeration equipment has door seals checked and condensers cleaned quarterly	1		

Tool 2 · Green Energy Evaluation Checklist

Sustainable SME Toolkit · Nigeria

#	Item	Wt	Rating (1-5)	Score
11	Major equipment (machines, ovens, compressors) is serviced on a written schedule	2		
12	Power factor has been measured and corrected if below 0.9 (for businesses with motors)	1		
13	Battery backup sizing has been calculated for at least 4 hours of critical load	2		
14	Inverter sizing covers continuous load plus 25% headroom for surge	2		
15	System design has been reviewed by an independent engineer (not just the vendor)	3		
16	You have read the REA (Rural Electrification Agency) programmes relevant to your area	2		
17	You have checked whether your site is served by an active mini-grid operator	1		
18	You have requested at least 2 competitive quotes from vetted solar installers	2		
19	Proposed system includes monitoring (online portal or app showing production and consumption)	2		
20	Vendor offers at least 5-year warranty on inverter and 10-year linear warranty on panels	2		
21	End-of-life plan for batteries and panels exists (returns to vendor or NESREA-licensed recycler)	1		
22	You have a financing plan (cash, BoI Solar Energy Fund, lease, or Pay-As-You-Go)	3
