

Tool 5 · Sustainability KPI Tracker

Sustainable SME Toolkit · Nigeria

This is not a scoring tool — it is a monthly tracker you copy and use to measure your sustainability performance over time. The KPIs below cover the four resource streams that almost every Nigerian SME consumes (electricity, fuel, water, paper) plus waste, recycling, and estimated carbon.

Fill in the “Target” column once at the start of the year based on last year’s actuals minus a realistic improvement (5–15% reduction is typical for an SME that is paying attention). Then fill in the “Actual” column at the end of each month. The Variance column auto-calculates so you can see at a glance whether you are on track.

#	KPI (unit)	Target	Jan	Feb	Mar	Apr	May	Jun	H1 Va
1	Grid electricity Unit: kWh								
2	Diesel / petrol Unit: Litres								
3	Water Unit: Litres								
4	General waste Unit: kg								
5	Recyclables diverted Unit: kg								
6	Paper consumed Unit: Reams								
7	Carbon (estimated) Unit: kg CO2e								

#	KPI (unit)	Target	Jul	Aug	Sep	Oct	Nov	Dec	H2 Va
1	Grid electricity Unit: kWh								
2	Diesel / petrol Unit: Litres								
3	Water Unit: Litres								
4	General waste Unit: kg								
5	Recyclables diverted Unit: kg								
6	Paper consumed Unit: Reams								
7	Carbon (estimated) Unit: kg CO2e
